

Screen firmware update steps:

1. Format the TF card as:

File system (F): FAT32 Allocation unit size (A): 4096 bytes

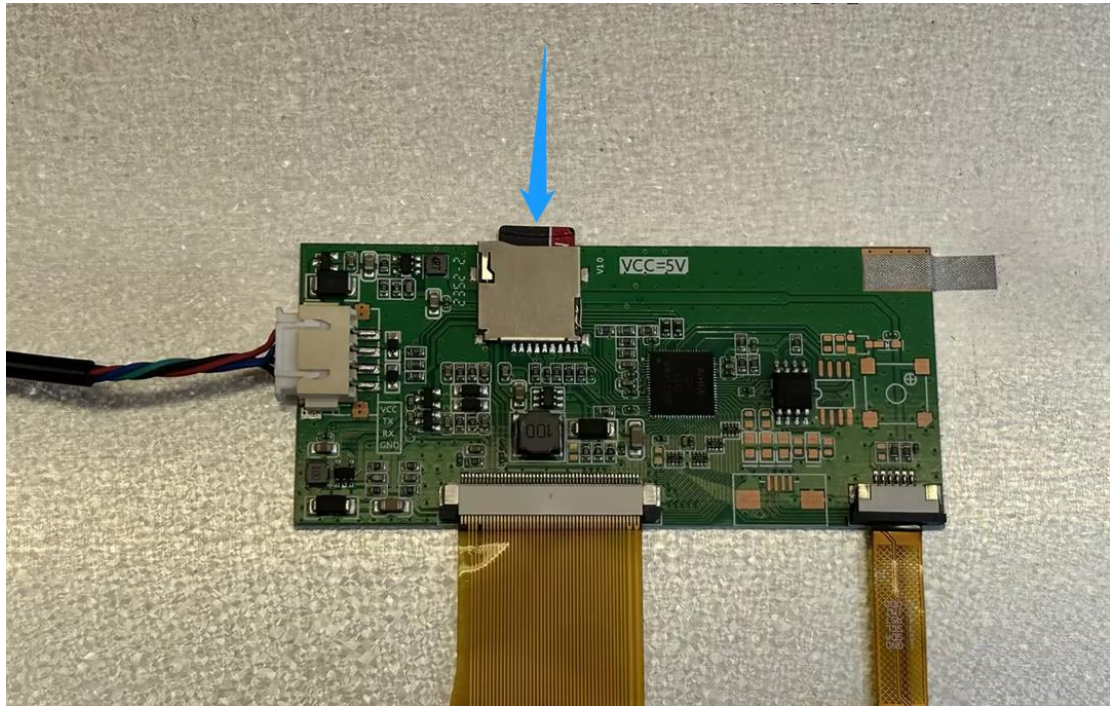

2. As shown in the figure, copy the “GIGA_UI_V1.1.3.tft” file under the “elegoo_giga_firmware_APP-V2.3.2.2_UI-V1.1.3/UI_V1.1.3” path to the root directory of the TF card:

3. Turn off the power of the machine, loosen the screws in the picture, and remove the screen casing.

4. As shown in the picture, insert the TF card into the screen motherboard.

5. Turn on the machine and wait for the firmware update to complete.
6. Remove the TF card and then shut down and restart.
